
YOUR INSTITUTION SUBSCRIBES TO FACULTY OF 1000

You have access to Faculty of 1000 (<http://F1000.com>), a unique online service that highlights and evaluates the top 2% of articles from among the wealth of biomedical literature published. Articles are selected by our Faculty of 10,000 expert researchers and clinicians who explain why those papers are important.

How can Faculty of 1000 help you?

Article evaluations: 100,000 expert evaluations, highlighting the world's most important articles in biology and medical research.

Sophisticated search facilities: run a quick keyword search or an advanced search by title, author, journal name, subject area, publication date or Faculty Member. You can also store your searches and have them emailed to you.

Top 10s: see the very best papers evaluated in the last month cross the whole of Biology and Medicine, or for individual Faculties. There are also Top 10s for the Most Viewed Papers. All content is updated daily.

F1000 Factors: articles are rated by evaluating Faculty Members; our F1000 Factor further distinguishes recommended articles from the truly exceptional.

Hidden Jewels: discover articles from lesser known journals, both in your specialty and in neighboring fields, that rank highly among F1000 experts.

PubMed Linkout: links to PubMed abstracts are available for each evaluation. In addition, each paper evaluation links directly to document delivery services and full text access to your library's holdings can be set up using SFX.

My F1000: customize the site to your areas of interest, store searches and set up email alerts.

F1000 Posters: an open access repository for biomedical posters from conferences, reviewed and evaluated by the Faculty.

F1000 Reports: open access, peer reviewed articles by the world's top scientists in which emerging topics identified by the Faculty are put into a broader context.

Daily news: Science reporting at its sharpest, including video interviews and debates.

Feature articles: Opinions and syntheses of the latest big ideas in biology and related disciplines, covering research, business, culture and technology.

Naturally Selected: Scientists and reporters blogging on top science news, opinions, and culture.

If you encounter any technical problems with the site or have any feedback regarding layout or content, please contact Customer Services by email at info@F1000.com.
